

Measuring Behavior 2012

Changes to the published program

Tuesday

1. Tuesday at 16:00, in the [Measuring Driver and Pilot Behaviour session](#), there will be an additional demonstration. This will be in parallel with the other demonstration.
2. The tutorial about multimodal data in The Observer is moved from Tuesday to Friday at 11:10 in room 40.
3. The program of the EthoVision user meeting is slightly altered; please see the [website](#).

Wednesday

4. Shahram Eivazi's talk (Measuring Situation Awareness of the Microneurosurgeons) scheduled for 11:30 on Wednesday (room Rood) has been cancelled.

Thursday

5. The E-Track stakeholders' meeting will take place in room A from 14:30 to 16:30 on Thursday 30th. This meeting is open to all participants with an interest in GPS tracking.
6. Jane Sutcliffe's talk on primate use of touchscreens on Thursday at 11:10 is cancelled. The last talk in that session (about paired associates learning by John Talpos) is moved to 11:10, and the discussion will therefore start at 12:10. For the full program, see the [website](#).
7. Some additional scientific tours are available since the program book was published. See the [website](#) for details.

Friday

8. There will be an extra demonstration on Friday at 14:00 in Room A, 'Automated assessment of animal health and wellbeing'. The SenseWell consortium will demonstrate a prototype of a novel enlarged home cage system with integrated recording of behavior, physiology and ultrasonic vocalizations of socially housed rats. The system is designed for automatic monitoring of animal health and early detection and prevention of chronic stress. For more information, click [here](#).
9. The tutorial about multimodal data in The Observer is moved from Tuesday to Friday at 11:10 in room 40.
